

eventCON - Winner of the Prolight & Sound Press Award 2016

Also in 2016 the international journalist met together at the Prolight & Sound and awarded the PIPA . For the sector Stage Technology the jury had the option between the rigging accessories fiRST Stage TH/30 ,the eventCON connector system and the Hazebase low pro. At the end, eventCON was the winner in this line of business, Congratulation.

During a gala event in hall 4.0 on the Prolight & Sound at the 7th of April with over 300 representative people of media, press, producers and distributors , the jury honoured eventCON for her clever and innovating development.

The connecting system eventCON convinced the international jury with the patent push lock mechanism for a quick and safe connection and the up to 20% reduced investment in equipment and time, during a installation with lighting products.. eventCON is only one of a few manufacture who offer VDE certification and IP 67, so working under rough outdoor conditions is smooth and smart.

Click-clever-connected

One key target of the eventCON engineers is, to reduce the installation process with cables and do it simple and safe as possible. It offer power and signal in one connector and in combination with hybrid cables, the users will have all advantages on her side in easy and very fast installations. It is an open system and they are able to build her own system or use given splitter or merger without losing the IP protection.
